

ALLAN KIPKEMBOI

AI DATA SPECIALIST | RLHF & SEMANTIC SEGMENTATION | AI TRAINER

Nairobi, Kenya | +254 745 956 337 | allankimm09@gmail.com | linkedin.com/in/allankipkemboi-55bb81358

PROFESSIONAL SUMMARY

Detail-oriented AI Data Specialist with experience across full-time, community-lead, and freelance roles building and refining high-quality datasets for machine learning, NLP, and computer vision systems. Hands-on expertise spans RLHF (Reinforcement Learning from Human Feedback), 3D LiDAR and point-cloud annotation, semantic segmentation, video/temporal annotation, and speech/audio data preparation. Delivered measurable quality gains, including a 15% reduction in user-reported factual errors across LLM outputs (10,000+ signals/week) and a 20% reduction in multimodal annotation errors. Professional working proficiency in English, Swahili, and German (C1) supports multilingual NLP, localization, and translation work. Seeking to bring precise, high-quality data operations expertise to teams building next-generation AI models.

CORE SKILLS

- RLHF & LLM Evaluation / Alignment Scoring
- Speech-to-Text (ASR) & TTS Annotation
- Video, Bounding Box & Polygon Annotation
- Data Quality Assurance & Cross-Annotator Consistency
- Semantic Segmentation & 3D LiDAR Annotation
- Audio Classification & Speaker Diarization
- NLP & Multilingual Localization (EN/SW/DE)
- Python, SQL & Data Validation Workflows

PROFESSIONAL EXPERIENCE

Community Lead & Contributor — *LeanGoogs AI* Aug 2026 – Present | Remote, Kenya

- Support onboarding and coordination of regional contributor networks through structured training pipelines and remote collaboration workflows to scale high-quality data generation.
- Evaluate, label, and align complex computer vision and NLP datasets using semantic segmentation and RLHF methodologies to strengthen model reasoning capabilities.
- Apply strict data alignment guidelines and curation metrics to keep datasets at enterprise quality standards; contribute to quality-control audits across community channels.

Freelance AI Data Annotation & Training Jan 2020 – Present

Delivering annotation, evaluation, and QA services across simultaneous freelance and contract engagements supporting AI, ML, and LLM development for industry-leading platforms:

| **Mindy Support AI Trainer** Sep 2026 – Present

- Annotate high-volume autonomous driving datasets including video sequences and telemetry graphs to train machine learning perception models.
- Apply precise labeling techniques (bounding boxes, polygons, and semantic segmentation) to track dynamic vehicles, static road features, and Vulnerable Road Users (VRUs).
- Interpret complex, multi-tiered classification guidelines to categorize behavioral edge cases, accurately distinguishing between nuanced yielding, overtaking, and queue-following logic.
- Analyze vehicle speed profiles and spatial mapping data to determine precise maneuver intent and validate sensor logic for autonomous navigation.
- Conduct rigorous data validation in a fast-paced production environment, consistently maintaining strict accuracy benchmarks and cross-annotator consistency.

| *OpenTrain AI* **Generalist Data Annotator**

May 2026 – Present

- Categorize, tag, and annotate multi-modal datasets (text, audio, image) to improve AI and machine learning model accuracy.

| *Uber AI Solutions* **Data Annotator**

Apr 2026 – Aug 2026

- Generated precision-labeled audio datasets for speech recognition (ASR) systems; transcribed, segmented, and classified audio for intent, sentiment, and acoustic event detection.
- Conducted rigorous QA on ASR datasets, directly improving natural language understanding accuracy for conversational AI models.

| *Atlas Capture* **Video Annotation Specialist**

Dec 2025 – Jun 2026

- Labeled temporal sequences across video frames to classify human actions, gestures, and activities for supervised learning pipelines.
- Maintained high inter-annotator agreement through consistent annotation schemas across large-scale video datasets.

| *Mercor* **General Data Annotation Expert**

Feb 2021 – Sep 2023

- Led RLHF pipeline deployment processing 10,000+ signals/week, reducing user-reported factual errors by 15%.
- Standardized LLM evaluation and ranking processes, driving measurable alignment-score improvements.
- Reduced multimodal (text/image/audio) annotation errors by 20% across diverse training datasets.

| *Remotasks* **AI Data Annotator**

Jan 2020 – Aug 2022

- Performed 3D LiDAR point-cloud labeling, multilingual audio transcription, and sentiment/intent classification for autonomous systems and NLP datasets.

Translator — *Intron | AI in Healthcare*

Aug 2024 – May 2026 | Nairobi, Kenya

- Delivered high-accuracy English–Swahili translation and localization, converting complex medical and technical terminology into culturally fluent Swahili.
- Maintained strict quality standards and turnaround times supporting AI-in-healthcare NLP datasets.

Data Analyst — *CloudFactory*

Sep 2022 – Dec 2023 | Nairobi, Kenya

- Performed Python/SQL-based data analysis, improving reporting accuracy and turnaround time.
- Designed validation workflows for data cleaning and preprocessing; streamlined KPI tracking via client data management.

Chemical Engineer Intern — *East African Breweries PLC (EABL)*

Oct 2020 – Sep 2021 | Nairobi, Kenya

- Completed a one-year placement focused on chemical engineering operations, assisting with data tracking, process control measurements, and mass transfer analysis within a production environment.

EDUCATION & LANGUAGES

Bachelor of Technology in Chemical Engineering

Expected 2027

The Technical University of Kenya (2022 – 2027)

- **English:** Native / Bilingual Proficiency
- **Swahili:** Native / Bilingual Proficiency
- **German:** Professional Working Proficiency (C1)
